

ThinkPad E16 Gen 3 (AMD)

Designed for business professionals, this laptop integrates cutting-edge technology to deliver peak performance and reliability. At its core, it features an AI-powered PC experience that adapts to usage patterns, optimizing system resources for enhanced productivity and responsiveness. Powered by AMD Ryzen™ 3 / 5 / 7 200 Series Processors, the device ensures smooth multitasking and efficient handling of demanding workloads, whether data analysis, presentations, or virtual meetings. With support for up to 64GB DDR5-5600 memory, users benefit from accelerated performance and reduced latency during intensive operations. And, up to 1TB 2x M.2 SSD storage enables lightning-fast boot times and ample space for large files and applications.

**Redefining possibilities with
powerful performance and
groundbreaking on-device AI**

The laptop delivers an exceptional audio through its 2W dual Dolby Atmos® stereo speakers, fine-tuned by HARMAN, that provides rich, immersive sound. Complementing this is a dual-microphone array with smart noise-cancelling technology, which filters background distractions to ensure crystal-clear voice capture during calls and conferences, even in noisy environments.

Powering this efficiency on the move is a robust 64Wh rechargeable Li-ion battery, offering extended usage hours and reducing dependency on charging throughout the day.

The optional 5.0MP camera offers exceptional clarity for video conferencing and virtual collaboration, while the built-in privacy shutter allows users to physically block the camera when not in use, enhancing privacy and security. Additionally, advanced temporal noise reduction technology enhances video quality in low-light environments by minimizing visual grain and distortion, ensuring a sharp and clear image even in dimly lit settings.
