Lenovo ThinkPad X13 Gen 7 *i*

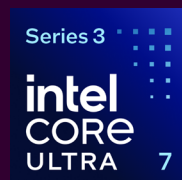

Premium 13" thin and light ultraportable
for extreme mobility

Next-gen AI PC powered by Intel® Core™
Ultra 7 Series 3 processor

Premium user experience for immersive collaboration

Impressive serviceability and robust connectivity

Copilot+PC

That's the power of Copilot+
PCs with Intel Inside®

Optimized for AI performance

The must-have tool for on-the-move professionals who demand a perfect balance of mobile productivity and elevated aesthetics, the premium Lenovo ThinkPad X13 Gen 7 *i* delivers AI PC power that won't weigh you down. Fueled by up to the Intel® Core™ Ultra 7 Series 3 processor that's purpose-built for real-world performance, long battery life, enterprise-grade security and unmatched manageability, this small and mighty laptop provides up to 50 TOPS NPU to optimize Copilot+ PC features for real-world benefits that boost innovation. With up to 64GB LP5x memory at 8533MHz speed for power efficiency and thermal management, processing high-bandwidth AI models is a breeze and large-scale multitasking never lags. The impressive intelligence extends to virtual collaboration, with Lenovo Clear Voice audio features like AI-driven noise suppression and the 5MP + IR camera that keeps you in focus for positive impact.

Ultralight premium portability

Weighing in at under 1kg (starting at 930g), the ThinkPad X13 Gen 7 *i* is currently the lightest device in Lenovo's ThinkPad lineup. Although it boasts a true Z height of less than 18mm, the single-bar hinge plus easy-open lid result in an 87.8% screen-to-body ratio for a large viewing area from this hyper-portable device. And that view is vivid and crisp, thanks to the bright 400nits, 100% sRGB 13" display. Easily expand your workspace wherever work takes you with the full array of I/O ports, including two USB-C, one USB-A and one HDMI—no dongles to juggle. For maximum unplugged productivity, this next-gen ThinkPad boasts four additional hours of battery life from the 100% recycled cobalt battery in 41Whr and 54.7Whr options, along with Wi-Fi 7 and up to 5G connectivity. In the field away from service? The optional NFC enables ongoing communication to get the job done.

Responsible, secure design

An additional super-smart feature of the super-portable ThinkPad X13 Gen 7 *i* is its industry-leading repairability, boasting five customer replaceable unit (CRU) components to minimize downtime and lengthen the device lifecycle. This go-everywhere device endures the inevitable drops, bumps and spills of demanding hybrid and remote work, with robust MIL-STD-810H durability and legendary Lenovo reliability. And the comprehensive, modern and resilient protection of Lenovo ThinkShield provides end-to-end security solutions for confident productivity. Always human-centric, Lenovo prioritizes accessibility and sustainability as well, with features like a tactile keyboard and LED light on the power port, along with recycled device materials, plastic-free primary packaging and energy certifications.

There are laptops. And there's ThinkPad.

Unapologetically professional and always focused on improving performance, Lenovo ThinkPad devices deliver timeless sophistication. Since 1992, function has defined form, with purpose and people over pretension. Although refined through the decades to stay one step ahead of tech's exponential advances, ThinkPad is still built for outcome-driven people who let their actions speak louder than flash.

Purposeful design

- Obsession with purpose-driven design elements—nothing is merely ornamental.
- Premium materials for beauty, efficiency, and strength.
- Best-in class repairability (customer replaceable units, iFixit partnership, easily replaceable keyboard).
- Clean, modern finishes that impress without boasting.

Keyboard innovation

- Industry-unique TrackPoint, the fastest, most comfortable way to move the cursor, with precise control, fatigue-free movement, and accessibility.
- Natural curve key shape to center your keystrokes and improve typing accuracy.
- Industry-leading accessibility features, like tactile keyboard markers and lighted indicators.

Trusted quality

- Robust real-world durability to withstand any environment and temperature extremes.
- Hinge life and port hardiness to endure on-the-move productivity.
- Certifications and mechanical design that combine to elevate resilience against drops, spills, and bumps.

Lenovo's relentless quest for perfection has made ThinkPad the most consistently top-rated business laptop in the world. But it's not a laptop. It's a ThinkPad.

Committed to sustainability

At Lenovo, we're focused on providing smarter technology that builds a brighter, more sustainable future for our customers, colleagues, communities, and the planet. We equip and empower you to pursue your sustainability goals with smarter end-to-end solutions, from how we make and ship your technology to how you use and return it.

The **Lenovo ThinkPad X13 Gen 7 i** is another example of how we continue innovating to provide technology solutions that are more energy efficient and human-centered. And we're proud to partner with industry leaders like Intel as we strive to solve humanity's greatest challenges.

Enhanced visuals

ThinkVision P27QD-40

The QHD display and variable refresh rate deliver sharp visuals and smooth performance for effortless multitasking. Optimize connectivity using the integrated USB-C docking solution, while Lenovo's LDFM and LADM software enable remote asset management and streamlined display control for a smarter workspace.

ThinkVision P32UD-40

Level up professional prowess with this 31.5" UHD (3840 x 2160) 4-sided ultra-thin bezel, IPS display, which delivers 98% DCI-P3, Thunderbolt4 docking, 140W power delivery and low power consumption for optimal viewing.

Services

Protection & Support Services

Designed to help maintain and evolve the capabilities of your devices over their lifespan with flexible options for warranty extensions, Lenovo Protection & Support Services also help minimize unplanned operating and maintenance expenses, enhancing the budget predictability of your IT operations.

Premier Support Plus

Direct access to advanced technicians for unscripted solutions, onsite support & a suite of smart services.

Premier Support

Advanced tech support 24/7/365 with single point of contact.

Accidental Damage Protection

Covers inevitable drops, spills & other accidents with unlimited claims for total peace of mind.

Digital Workplace Solutions with xIQ Digital Workplace Platform

Powered by Gen AI technology, Lenovo's comprehensive and flexible Digital Workplace Solutions with the xIQ Digital Workplace Platform create a hyper-personalized experience that boosts employee satisfaction and productivity, automating workflows to streamline tasks and reduce IT strain.

TruScale DaaS

Empower everyone with next-gen devices and maximize ROI with one flexible, subscription-based service for device lifecycle management, security, and sustainability.

TruScale DaaS for Sustainability

Modular DaaS solution with Sustainability services that help manage IT carbon footprint, reduce IT costs & boost ROI.

TruScale DaaS for AI PC

Bundles AI-powered devices, infrastructure, and services into a pay-as-you-go XaaS model.

Security Services

Build total cyber-resiliency from pocket to cloud. Strengthen your cybersecurity across every layer of your business with a comprehensive, AI-enabled one-stop solution.

Managed Services

Remote monitoring & management to enhance device health, security & reliability.

AI Services

From strategy to scale, Lenovo helps you design, deploy, and manage secure AI solutions that align with your goals and deliver measurable ROI.

AI Discover

Assessment of AI readiness across security, people, processes & technology for tailored roadmap to drive business value.

AI Adoption & Change Management

Helps integrate AI technologies, upskill employees, drive engagement to maximize ROI, addressing unique infrastructure & culture challenges.

ThinkShield

Lenovo is committed to being our customer's most trusted technology supplier. ThinkShield delivers **Comprehensive, Modern, and Resilient** solutions to defend your business.

COMPREHENSIVE

End-to-end protection against attacks at every level.

MODERN

AI-driven threat prevention, behavior-based analysis, and self-healing BIOS capabilities.

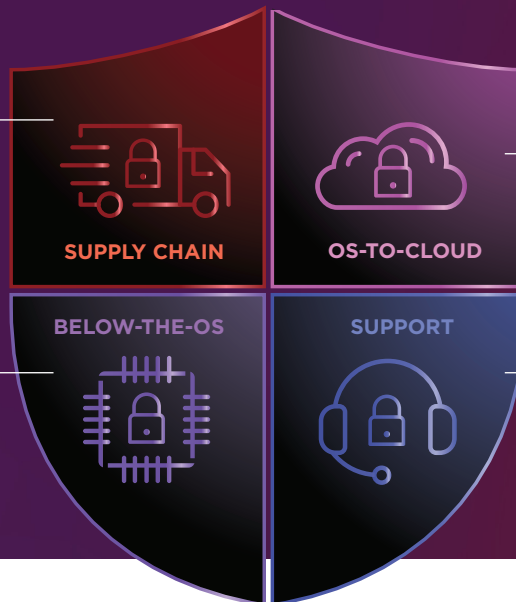

RESILIENT

Minimized disruptions by diagnosing and remediating device health issues for productivity.

Lenovo ThinkShield, protecting your business, everywhere.

Secure from the start

End-to-end supply chain protection with verifiable hardware and software assurance.

Smarter protection with AI + XDR

AI-powered security that safeguards against ransomware, phishing and data loss before they happen.

Integrity at every level

Fleet-wide firmware and hardware defense against rogue devices and advanced attacks.

Always on

Expert protection and support, seamlessly handled by one trusted partner, 24x7.

One partner, total protection.

Fueled by delivering smarter technology for all, Lenovo ThinkShield is constantly evolving our hardware, software and services to provide reliable security solutions to defend your business—without compromising end-user productivity.

Safeguard your assets

Ensure end-to-end protection and reduce attack surface

Automate protection to boost efficiency

Tailor plans to suit your needs

Stay compliant with regulatory standards

ThinkVantage Technologies

Enriching the Think experience.

For over 20 years, ThinkVantage Technologies (TVT) has been simplifying device management, increasing fleet stability, reducing the costs of IT admin/ops, and keeping endusers happy. It's a heavy burden to manage PCs. We meet you where you are to solve the challenges that keep you awake at night.

Reduce IT overhead through automation of deployment, patching & updates.

Accelerate modernization with tools that support modern management frameworks.

Improve user experience with proactive system health monitoring & self-healing capabilities.

Enhance security & compliance with integrated asset tracking & sustainability insights.

Lenovo Device Orchestration

Your administrative UI to optimize fleet management.

Lenovo Device Orchestration (LDO) is an intelligent endpoint management solution that empowers IT teams to monitor, manage, and optimize devices against common issues. LDO enhances the health, security, and performance of your devices, reducing downtime and boosting employee productivity.

- Gen AI power designed to help IT/Ops manage devices at scale with greater efficiency, insight, and automation.
- AI-generated proactive and predictive insights, remote access and control of PCs, and hardware inventory.
- Cloud-based service for real-time results with no infrastructure setup or investment required.
- Admin/Operations-facing controls for behind-the-user management.

ThinkVantage Technologies

From deployment to sustained productivity, ThinkVantage Technologies streamline workflow efficiencies through expert guidance, customized solutions, and centralized fleet management. TVT is device management, your way.
