Lenovo ThinkPad T14s Gen 7

Ultra-light high-performing mobility, starting at 1.11kg

Serviceable by design, with fleet-first CRU repairability

AMD Ryzen™ AI PRO 400 Series processor and
on-device AI with Copilot+ PC features

Modern collaboration experience with 5MP camera,
vHDR & Lenovo Computer Vision

AMD
RYZEN AI
PRO 400 Series

Light & portable AI-optimized performance

Starting at just 1.11 kg, the Lenovo ThinkPad T14s Gen 7 is lighter than ever for premium mobility. Powered by the AMD Ryzen™ AI PRO 400 Series processor to deliver enterprise-grade performance with next-gen AI capabilities for accelerated productivity, enhanced collaboration, and strengthened security, this go-everywhere clamshell fuels today's hybrid workforce. The powerful NPU lets you tap into local AI processing for personalized and secure workflow efficiency, including Copilot+ PC on-device AI features for powerful, smart computing that boosts innovation, enhances communication, and increases productivity. With an upgraded 25W Thermal Design Power (TDP), users get a boost in performance for simultaneous app use, intensive workloads, and video editing, all while maintaining efficient battery life and quieter operation.

Premium user experience

With a cool, modern aesthetic to match its unflappable performance, this portable powerhouse elevates the everyday user experience. You'll love the stunning 2.8K 14" OLED display with 500nits paired with exceptional audio quality from the larger user-facing speakers and smart amp. The 5MP IR camera with Lenovo Computer Vision enhances privacy and digital health, with AI-driven features like Shield Mode and Smart Display, while the innovative vHDR technology varies display quality based on workflow demands to optimize battery power. And with a Platinum Calm Tech Certified™ rating, this unflappable laptop minimizes tech stress and prioritizes user wellbeing. Workspace expansion is a snap as well, thanks to the convenience of three USB-C ports to ensure high-speed, reliable connectivity for whatever peripherals you need—no dongles needed. Plus, the higher density 58Whr battery packs more unplugged punch into a smaller, more efficient battery footprint, so all-day on-the-go is no problem.

Serviceable, secure & sustainable

Built to endure, the ThinkPad T14s Gen 7 amplifies ThinkPad's legendary durability with an industry-leading standard of full fleet-first CRU reparability. Common replaceable and serviceable parts across the series, including battery, USB-C ports, I/O Daughter Card and storage, along with no-frustration captive screws, minimize downtime for maximum productivity. Backed by AMD PRO technologies for security, manageability and stability, this device is purpose-built for the AI-powered future of enterprise computing. The comprehensive, modern and resilient protection of ThinkShield Security, including firmware-level defenses, effectively neutralizes critical vulnerabilities within your fleet. And to round out the responsible design, Lenovo uses significant recycled materials for this device, adheres to green certifications and offers Lenovo Sustainability Services.

There are laptops. And there's ThinkPad.

Unapologetically professional and always focused on improving performance, Lenovo ThinkPad devices deliver timeless sophistication. Since 1992, function has defined form, with purpose and people over pretension. Although refined through the decades to stay one step ahead of tech's exponential advances, ThinkPad is still built for outcome-driven people who let their actions speak louder than flash.

Purposeful design

- Obsession with purpose-driven design elements—nothing is merely ornamental.
- Premium materials for beauty, efficiency, and strength.
- Best-in class repairability (customer replaceable units, iFixit partnership, easily replaceable keyboard).
- Clean, modern finishes that impress without boasting.

Calm Tech Certified™

- Reduced cognitive load with industry-unique TrackPoint for no-look, ergonomic cursor control.
- Natural curve key shape, low-blue-light displays and soft-touch, grippy materials for user ease and comfort.
- Industry-leading accessibility features, like tactile keyboard markers and lighted indicators for user stress reduction.

Trusted quality

- Robust real-world durability to withstand any environment and temperature extremes.
- Hinge life and port hardiness to endure on-the-move productivity.
- Certifications and mechanical design that combine to elevate resilience against drops, spills, and bumps.

Lenovo's relentless quest for perfection has made ThinkPad the most consistently top-rated business laptop in the world. But it's not a laptop. It's a ThinkPad.

Committed to sustainability

At Lenovo, we're focused on providing smarter technology that builds a brighter, more sustainable future for our customers, colleagues, communities, and the planet. We equip and empower you to pursue your sustainability goals with smarter end-to-end solutions, from how we make and ship your technology to how you use and return it.

The **Lenovo ThinkPad T14s Gen 7** is another example of how we continue innovating to provide technology solutions that are more energy efficient and human-centered. And we're proud to partner with industry leaders like AMD as we strive to solve humanity's greatest challenges.

Responsible design	Lenovo ThinkPad T14s Gen 7
A cover	CFRP (100% biobased) + PCGF (30% PCC)
B bezel	50% PCC recycled plastic
C cover	90% recycled magnesium
D cover	50% recycled magnesium or 50% recycled aluminum

Accessories

ThinkPad USB4 Smart Dock 5500

Experience 4x the bandwidth with an enterprise-grade smart dock that delivers powerful charging, multi-display support, extensive port expansion, and next-gen cloud-based management.

PN: 40BC0100xx

Lenovo Wireless Multi-Mode Pro Plus Mouse 6050

Combined with six customizable buttons, this mouse is designed for professionals who work across multiple devices—laptops, tablets, and even phones—enabling seamless switching and control.

PN: 4Y51S61876 - 4Y51S61879

Lenovo Wireless VoIP Headset (Teams)

Engineered for the hybrid workspace, this Microsoft Teams certified headset delivers seamless connectivity via Bluetooth® with multipoint support and up to 31 hours of talk time. Designed for comfort with adjustable memory foam ear cups, it ensures clear communication and all day ease.

PN: 4XD1M80020

ThinkPad Professional 16-inch Backpack Gen 2

Crafted from lightweight, durable materials, it efficiently organizes and protects your gear—including 16" laptops and small devices—all in a stylish, sustainable design built for everyday resilience.

PN: 4X41M69794

Enhanced visuals

ThinkVision T34WD-40

Improve your workflow immersion and efficiency with this 34-inch VA panel and its 1500R curvature, all while eliminating eye strain with Eye Comfort 5-Star Certification by TÜV Rheinland. The monitor's USB-C docking solution and USB hub make every workday more convenient.

ThinkVision P27QD-40

The QHD display and variable refresh rate deliver sharp visuals and smooth performance for effortless multitasking. Optimize connectivity using the integrated USB-C docking solution, while Lenovo's LDFM and LADM software enable remote asset management and streamlined display control for a smarter workspace.

Services

Protection & Support Services

Designed to help maintain and evolve the capabilities of your devices over their lifespan with flexible options for warranty extensions, Lenovo Protection & Support Services also help minimize unplanned operating and maintenance expenses, enhancing the budget predictability of your IT operations.

Premier Support Plus

Direct access to advanced technicians for unscripted solutions, onsite support & a suite of smart services.

Premier Support

Advanced tech support 24/7/365 with single point of contact.

Accidental Damage Protection

Covers inevitable drops, spills & other accidents with unlimited claims for total peace of mind.

Digital Workplace Solutions with xIQ Digital Workplace Platform

Powered by Gen AI technology, Lenovo's comprehensive and flexible Digital Workplace Solutions with the xIQ Digital Workplace Platform create a hyper-personalized experience that boosts employee satisfaction and productivity, automating workflows to streamline tasks and reduce IT strain.

TruScale DaaS

Empower everyone with next-gen devices and maximize ROI with one flexible, subscription-based service for device lifecycle management, security, and sustainability.

TruScale DaaS for Sustainability

Modular DaaS solution with Sustainability services that help manage IT carbon footprint, reduce IT costs & boost ROI.

TruScale DaaS for AI PC

Bundles AI-powered devices, infrastructure, and services into a pay-as-you-go XaaS model.

Security Services

Build total cyber-resiliency from pocket to cloud. Strengthen your cybersecurity across every layer of your business with a comprehensive, AI-enabled one-stop solution.

Managed Services

Remote monitoring & management to enhance device health, security & reliability.

AI Services

From strategy to scale, Lenovo helps you design, deploy, and manage secure AI solutions that align with your goals and deliver measurable ROI.

AI Discover

Assessment of AI readiness across security, people, processes & technology for tailored roadmap to drive business value.

AI Adoption & Change Management

Helps integrate AI technologies, upskill employees, drive engagement to maximize ROI, addressing unique infrastructure & culture challenges.

ThinkShield

Lenovo is committed to being our customer's most trusted technology supplier. ThinkShield delivers **Comprehensive, Modern, and Resilient** solutions to defend your business.

COMPREHENSIVE

End-to-end protection against attacks at every level.

MODERN

AI-driven threat prevention, behavior-based analysis, and self-healing BIOS capabilities.

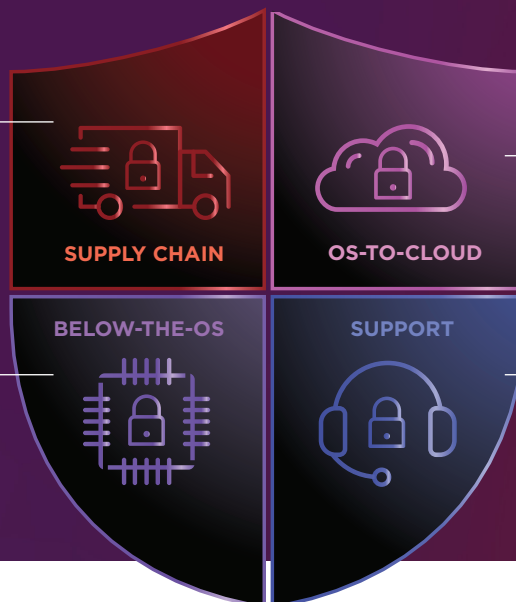

RESILIENT

Minimized disruptions by diagnosing and remediating device health issues for productivity.

Lenovo ThinkShield, protecting your business, everywhere.

Secure from the start

End-to-end supply chain protection with verifiable hardware and software assurance.

Smarter protection with AI + XDR

AI-powered security that safeguards against ransomware, phishing and data loss before they happen.

Integrity at every level

Fleet-wide firmware and hardware defense against rogue devices and advanced attacks.

Always on

Expert protection and support, seamlessly handled by one trusted partner, 24x7.

One partner, total protection.

Fueled by delivering smarter technology for all, Lenovo ThinkShield is constantly evolving our hardware, software and services to provide reliable security solutions to defend your business—without compromising end-user productivity.

Safeguard your assets

Ensure end-to-end protection and reduce attack surface

Automate protection to boost efficiency

Tailor plans to suit your needs

Stay compliant with regulatory standards

ThinkVantage Technologies

Enriching the Think experience.

For over 20 years, ThinkVantage Technologies (TVT) has been simplifying device management, increasing fleet stability, reducing the costs of IT admin/ops, and keeping endusers happy. It's a heavy burden to manage PCs. We meet you where you are to solve the challenges that keep you awake at night.

Reduce IT overhead through automation of deployment, patching & updates.

Accelerate modernization with tools that support modern management frameworks.

Improve user experience with proactive system health monitoring & self-healing capabilities.

Enhance security & compliance with integrated asset tracking & sustainability insights.

Lenovo Device Orchestration

Your administrative UI to optimize fleet management.

Lenovo Device Orchestration (LDO) is an intelligent endpoint management solution that empowers IT teams to monitor, manage, and optimize devices against common issues. LDO enhances the health, security, and performance of your devices, reducing downtime and boosting employee productivity.

- Gen AI power designed to help IT/Ops manage devices at scale with greater efficiency, insight, and automation.
- AI-generated proactive and predictive insights, remote access and control of PCs, and hardware inventory.
- Cloud-based service for real-time results with no infrastructure setup or investment required.
- Admin/Operations-facing controls for behind-the-user management.

ThinkVantage Technologies

From deployment to sustained productivity, ThinkVantage Technologies streamline workflow efficiencies through expert guidance, customized solutions, and centralized fleet management. TVT is device management, your way.
